Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Priority

This application discloses and claims only subject matter disclosed in prior Application No. 10/153,361, filed May 21, 2002 (now U.S. Patent 6,649,829 B2), and names an inventor or inventors named in the prior application. Accordingly, this application may constitute a continuation or division. Should applicants desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 119(e) and 37 CFR 1.78. Note that if applicants claim the benefit of Application 10/153,361 then a new Oath is needed.

If the applicants desire not to obtain the benefit of the filing date of the prior application above mentioned, then applicants' claim for domestic priority under 35 U.S.C. 120 for Provisional application No. 60/292,477 fails to provide adequate support because the current application was filed more than one year from the filing date of the Provisional application.

Claim Objections

The numbering of claims is objected because the claims are not numbered consecutively (i.e. claim number 39 is missing).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 2831

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-37, 41 and 44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,649,829. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application is claiming a first and second transmitters of respective couplers being constructed and arranged to communicate when said respective couplers are in a pre-coupled position, wherein said pre-coupled position is defined where the first coupler being partially inserted with the second coupler, for which Patent '829 is claiming the same. Moreover, '829 discloses the claimed invention except for the first and second couplers being electrical couplers (claims 38, 42 and 45) nor fluid couplers (claims 40, 43 and 46). It would be have been obvious to one having ordinary skill in the art at the time the invention was made to have either electrical or fluid couplers since it was known in the art that these two types of couplers exist and depending on the task at hand the correct coupler would be use.
